Terrence Holmes

Gameplay and Systems Programmer

Phone: (360) 603-1523 **Email:** TerrenceHolmesDev@gmail.com
Location: Bellingham, WA

Current Project

Bounty Hunter Bartender - Exp. 2027
(Gameplay and Systems Programmer, Unreal 5 C++)
https://www.softlockstudiollc.com/games

- Engineered core gameplay mechanics, including weapons, mini-games, and other interactive systems.
- Communicated C++ systems with short video demos and concise documentation.
- Participated in regular team meetings to stay aligned on project goals, track progress and refine the game design.
- Recorded video clips and captured screenshots throughout development to be used as promotional material on social media.

Completed Projects

License to Grill - 2025
(Gameplay and Systems Programmer, Unreal 5 C++)
https://store.steampowered.com/app/3884700/License_to_Grill/

- Collaborated with a team to polish and ship the project to Steam under a tight deadline.
- Developed networked gameplay systems enabling real-time multiplayer interactions.
- Designed and engineered player vs. player combat with ranged and melee weapons.

Get Off My Cloud - 2026
(Gameplay Designer & Programmer, Unreal 5 C++)
https://aieseattle.itch.io/get-off-my-cloud

- Assisted in designing player vs. player combat.
- Scripted custom player movement and combat systems using Unreal Blueprints.
- Collaborated with a team of developers to analyze, modify and refine gameplay mechanics.
- Mixed audio clips to create sound effects and implemented them into the project.

Lobster Roll - 2024
(Lead programmer, Unity C#)
https://aieseattle.itch.io/lobsterroll

- Engineered all gameplay mechanics according to instructions provided by our lead designer.
- Designed and programmed editor tools for other developers to use in crafting levels.
- Lead and directed team members in creating UI functionality and debugging code.

Skills

Programming Languages

- C# / C++ (delegates, interfaces, collections, enums)
- GDScript (annotations, collections, enums, callables)
- GameMaker Language (event system, coroutines)

Game Engines

- Unreal Engine (C++, Blueprints, Chaos physics, networking, UI, OpenXR, audio management)
- Godot (2D/3D, pathfinding, signals, resources, editor tools, animation system, audio management)
- Unity (2D/3D, UI Toolkit, PhysX and Box2D physics, input system, animation system, audio management)
- GameMaker: Studio (tilesets, input system, animation)

Tools & Version Control

- Git, Perforce
- Microsoft Office
- Krita, Paint.net
- Digital Audio Workstations (Cakewalk, Reaper, Garage Band)
- Video Editing Software (DaVinci Resolve, Open Broadcaster Software, Corel Video Studio)

Soft Skills

- Team collaboration and communication
- Time management
- Project documentation
- Working under pressure

Education

Advanced Diploma in
Programming for Video Games … Jul 2025
Advanced Diploma in
Game Design and Production … Exp. Jul 2027
Academy of Interactive Entertainment (AIE)
– Seattle, WA
